FEBRUARY 2023

Dear Hiring Manager,,

It is very nice to meet you. Thank you in advance for considering me for a software developer position within your company.

As you can see from my resume, I am returning to the workforce after many years. In 2001, I gave birth to my son and decided to be a stay at home mother. Last year, I decided to attend a full stack software developer bootcamp. I fell in love with the material and successfully completed three stacks.; two of which I completed with honors. I am eager to embark on this new career.

I am a reliable person who is a valuable addition to your company. The bootcamp was challenging . The subject was new to me and the pace was accelerated, but I quickly adapted to the new material and learned the mindset it takes to be successful in this field. Because I took this course online, I also learned the skills to efficiently work remotely.

There are many aspects of this field that intrigue me. I enjoy being able to create something functional. When errors occur, or code becomes too wordy, I am able to use my problem solving skills. Things are continuously changing within this field and that feeds my love to learn new things.

I am excited and eager to meet you so that we may discuss how I am beneficial to your company. Please contact me at the email or phone number listed above. I appreciate you taking the time to review this.

Sincerely,
Victoria Smith
